

Product Data Sheet

PS-00235, Rev. K
April 2011

Micro Motion® Technical Overview and Specification Summary

Emerson's world-leading Micro Motion® Coriolis flow and density measurement devices have set the standard for superior measurement technology. Micro Motion truly offers the best measurement solutions for any process challenge.

Technology leadership

Micro Motion is committed to technology innovations that deliver the highest-performing solutions for your complex measurement challenges.

Widest breadth of products

Micro Motion has the widest range of flow and density measurement devices for virtually any process, application, or fluid. A wide variety of wetted materials, line sizes, and an extensive range of output options enable optimal system integration.

Unparalleled value

Benefit from expert field and technical application service and support made possible from more than 600,000 meters installed worldwide and over 30 years of flow and density measurement experience.

‡ Flow rate of product based on concentration. For example, in a dissolved sugar solution, the measurement is the flow rate of the sugar alone.

Micro Motion Coriolis flow and density meters

ELITE

Peak performance Coriolis meter

- Best precision flow and density measurement
- Superior performance in the most challenging applications

7835

Peak performance density meter

- Best precision density measurement
- Industry standard for fiscal hydrocarbon measurement
- Superior reliability

F-Series

High performance compact drainable Coriolis meter

- Best flow and density measurement in a compact, drainable flow meter
- Broadest range of application coverage
- Superior reliability and safety

7845 / 7847

High performance density meter

- Superior precision density measurement
- Broadest range of density measurement
- Superior reliability

H-Series

Hygienic compact drainable Coriolis meter

- Best flow and density measurement in a compact hygienic flow meter
- Comprehensive hygienic application coverage
- Superior reliability

7812

Fiscal gas density meter

- Best precision gas density measurement
- Industry standard for fiscal hydrocarbon measurement
- Superior reliability and safety

T-Series

Straight tube full-bore Coriolis meter

- Superior flow measurement in a single straight tube flow meter
- Comprehensive hygienic application coverage
- Superior reliability

7826 / 7828

Direct insertion density meter

- High accuracy density measurement
- Greatest installation flexibility
- Superior reliability and safety

R-Series

General purpose flow-only Coriolis meter

- Simple to install and easy to use Coriolis flow measurement
- Broadest range of application coverage
- Superior reliability

7827 / 7829

Direct insertion viscosity meter

- Multivariable measurement of viscosity, density, and temperature
- Unique direct insertion design
- Superior reliability and safety

LF-Series

Extreme low-flow Coriolis meter

- Highest precision miniaturized flow meter
- Scalable platform for the most demanding low-flow applications
- Superior reliability

3098

Gas specific gravity meter

- Direct measurement of gas specific gravity
- Continuous online measurement
- Fast speed of response

Micro Motion transmitters and controllers

Micro Motion transmitters and controllers from Emerson Process Management utilize MVD™ technology to deliver accurate, high-speed multivariable signals. Micro Motion transmitters are available with a wide selection of communication protocols, including HART®, FOUNDATION™ fieldbus, PROFIBUS, DeviceNet™, Modbus®, and more. Micro Motion transmitters also carry advanced diagnostic tools, allowing you to rest easy knowing your process is being monitored correctly.

Only MVD technology allows you to:

- Dramatically reduce signal noise and obtain faster response times compared to analog devices
- Measure multiple variables for accurate process control
- Identify and resolve problems easily with built-in smart diagnostics
- Check performance with true in-situ meter verification

1500/2500

Compact control-room transmitter

- DIN rail mount with flexible installation options
- Wide variety of I/O and application capabilities to fit your needs

2200S

2-wire transmitter

- Loop powered for simple installation
- Compact design integrally mounted to sensor

1700/2700

Versatile field-mount transmitter

- Integral and remote mount options
- Wide variety of I/O and application capabilities to fit your needs

2400S

Compact integral transmitter

- Simple I/O options

FMT

Compact filling and dosing transmitter

- Easy-to-clean, hygienic design that enables SIP/CIP
- Highest accuracy and fast response time

The Series 3000 product line offers basic PLC-type functionality such as easy one-stage and two-stage batch control with ticket printing output. In addition, the Model 3500 and Model 3700 offer MVD transmitter functionality, combining transmitter and controller in a single package.

The Series 3000 also offers:

- A single operator interface for easy startup, control, and operation
- Full configuration capabilities that eliminate the need for external tools
- Effective security capabilities suitable for custody transfer applications

3300

Rack/panel mount discrete controller

3500

Rack/panel mount transmitter with discrete controller

3350

Field mount discrete controller

3700

Field mount transmitter with discrete controller

Accuracy – Liquids and slurries

	Flow accuracy ⁽¹⁾		Temperature	Density (kg/m ³) ⁽¹⁾
	Mass	Volume		
ELITE	±0,05% ⁽²⁾	±0,05% ⁽²⁾	±1 °C	±0,2 ⁽²⁾
F-Series	±0,10%	±0,15%	±1 °C	±1,0
H-Series	±0,10%	±0,15%	±1 °C	±1,0
T-Series	±0,15%	±0,25%	±1 °C	±2,0
R-Series	±0,50%	±0,50%	±1 °C	—
LF-Series	±0,50%	±0,50%	±1 °C	±5,0
7835	—	—	Class A RTD	±0,1
7845/7847	—	—	Class A RTD	±0,1
7826/7828	—	—	Class B RTD	±1,0

(1) Flow rate accuracies are base percentages. For total accuracy see the box on page 7. Stated accuracy includes the combined effects of repeatability, linearity, and hysteresis. Specifications for ELITE ±0,2 kg/m³ density accuracy are based on reference conditions of water at 20 to 60 °C and 1 to 2 bar. All other specifications are based on reference conditions of water at 20 to 25 °C and 1 to 2 bar.

(2) The accuracy for some ELITE sensor models may differ. Consult the ELITE Product Data Sheet for details.

Repeatability – Liquids and slurries

	Flow	Density (kg/m ³)
ELITE	±0,025%	±0,1
F-Series	±0,05%	±0,5
H-Series	±0,05%	±0,5
T-Series	±0,05%	±0,5
R-Series	±0,25%	—
LF-Series	±0,05%	±2,0
7835	—	±0,02
7845/7847	—	±0,05
7826/7828	—	±0,1

Performance – Gases

	Mass flow accuracy ⁽¹⁾	Temperature	Density
ELITE	±0,35%	±1 °C	—
F-Series	±0,50%	±1 °C	—
H-Series	±0,50%	±1 °C	—
T-Series	±0,50%	±1 °C	—
R-Series	±0,75%	±1 °C	—
LF-Series	±0,50%	±1 °C	—
7812	—	Class A RTD	±0,10%
3098	—	—	±0,10%

(1) Flow accuracies are base percentages. For total accuracy, see the box on this page. Stated accuracy includes the combined effects of repeatability, linearity, and hysteresis.

Total accuracy with transmitter with MVD technology

If flow rate $\geq \frac{\text{zero stability}}{(\text{base accuracy \%}) \div 100}$ then total accuracy = \pm base accuracy % of rate

If flow rate $< \frac{\text{zero stability}}{(\text{base accuracy \%}) \div 100}$ then total accuracy = $\pm \left[\left(\frac{\text{zero stability}}{\text{flow rate}} \right) \times 100 \right]$ % of rate

NOTE: For zero stabilities, see page 8.

Product Selector/Configurator

Micro Motion offers an on-line program for finding the best products to fit your application. The Product Selector/Configurator allows you to specify the parameters that matter to you, such as accuracy, flow capacity, pressure drop, or turndown. To use the Product Selector/Configurator, visit our web site at www.micromotion.com.

7812		n/a	0,01
3098		n/a	0,216

(1) Normal (Nm³/hr) reference conditions are 1,013 bar and 0 °C.

Standard or Normal Volumetric Capability

Standard and normal volumes are “quasi mass” flow units for any fixed composition fluid. Standard and normal volumes do not vary with operating pressure, temperature, or density. With knowledge of density at standard or normal conditions (available from reference sources), a Micro Motion meter can be configured to output in standard or normal volume units without the need for pressure, temperature, or density compensation. Contact your local sales representative for more information.

Temperature ratings

Family	Model	°C ⁽¹⁾
ELITE	Standard models	-240 to +204
	High-temperature models	-50 to +350
F-Series	Standard models	-100 to +204
	High-temperature models	-40 to +350
H-Series	All models	-100 to +204
T-Series	All models	-50 to +150
R-Series	All models	-50 to +125
LF-Series	All models	0 to +65
7835		-50 to +110
7845/7847		-50 to +160
7826/7828		-50 to +200
7812		-20 to +125 ⁽²⁾
3098		-30 to +50

(1) Temperature rating may be affected by electronics, hazardous area classification, and/or ambient temperature.

(2) High-temperature option shown. Standard temperature range is -20 to +85 °C.

Pressure ratings

Family	Model	Material	bar
ELITE	Standard models	Stainless steel	100–125
		Nickel alloy	170–225
	CMF010P	Nickel alloy ⁽¹⁾	413
	CMFS010P		
	CMFS010H		
	CMFS015P		
CMFS015H			
	CMF400P	Nickel alloy	205
F-Series	Standard models	Stainless steel	100
		Nickel alloy	148
	F025P	Stainless steel	158
	F050P	Stainless steel	345
H-Series	All models	Stainless steel	100
T-Series	All models	Titanium	100
R-Series	All models	Stainless steel	100
LF-Series	All models	Stainless steel	100
7835		Ni-Span-C and stainless steel	150
7845		Stainless steel	100
7847		Stainless steel and nickel alloy	20
7826/7828		Stainless steel and nickel alloy	207
7812		Ni-Span-C	250
3098		Ni-Span-C	10

(1) Models CMF010P, CMFS010P, CMFS015P, and CMF400P have nickel alloy tubes and stainless steel fittings.

Micro Motion—The undisputed leader in flow and density measurement

World-leading Micro Motion measurement solutions from Emerson Process Management deliver what you need most:

Technology leadership

Micro Motion introduced the first reliable Coriolis meter in 1977. Since that time, our ongoing product development has enabled us to provide the highest performing measurement devices available.

Product breadth

From compact, drainable process control to high flow rate fiscal transfer—look no further than Micro Motion for the widest range of measurement solutions.

Unparalleled value

Benefit from expert phone, field, and application service and support made possible by more than 600000 meters installed worldwide and over 30 years of flow and density measurement experience.
